Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2833

1. Applicant's election of species 1, figs. 1-7, claims 1-6 in paper dated 2/18/05, is acknowledged.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

3. (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Sipe (522).

The disclosure of Sipe provides a complete response to each and every element set forth in the claims. For example, figs. 1, 3, 7 & 9 show a plurality of terminals 127, compliant sections 128, a main board 910, a plurality of sub-boards 130 equipped with lands 332, 326), contact sections 310, a mating connector 200, a housing (110, 120, 140).

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sipe (522) in view of McGrath et al.

Art Unit: 2833

Sipe does not show a part of land which is close to the edge and is narrower than the remainder of the land. McGrath et al, figs. 3 show a part of land (44a, 44b) which is close to the edge and is narrower than the remainder of the land 44. It would have been obvious to one with skill in the art to modify the connector of Sipe by forming a part of land which is close to the edge to be narrower than the remainder of the land, as taught by McGrath, in order to provide an improved edge card connector that operates with impedances in high speed signal applications.

7. Forman, Benham et al, Hasircoglu and Billman are cited for disclosure of electrical connector assembly having circuit boards.

8. Any inquiry concerning this communication should be directed to Hien D. Vu at telephone number (571) 272-2016.
